

tin (ii) chloride

Where is tin (ii) chloride found?

Tin (II) chloride is used in electrolytic baths for tin plating and also as a food additive because it serves as a color-retaining agent and antioxidant. It is found in tin cans, toothpastes, and canned and bottled food.

How can you avoid contact with tin (ii) chloride?

Avoid products that list any of the following names in the ingredients:

- AI3-51686
- C.I. 77864
- CCRIS 560
- CI 77864
- Dichlorotin
- EINECS 231-868-0
- HSDB 582
- NCI-C02722
- Stannous chloride
- Stannous chloride, anhydrous
- Stannous dichloride
- Tin Protochloride
- Tin chloride (SnCl₂)
- Tin dichloride
- Tin(II) chloride
- Tin(II) chloride (1:2)
- Uniston CR-HT 200

What are some products that may contain tin (ii) chloride?

Toothpaste

A clinician's point of view.

Additional resources and links for tin (ii) chloride.

To submit resources or links, please fill out the submission form at the top of this page.

For additional information about products that might contain tin (ii) chloride, visit the Household Products Database online at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
