

molybdenum (v) chloride

Where is **molybdenum (v) chloride** found?

Molybdenum (V) chloride is a reagent used in the creation of molybdenum compounds. Molybdenum compounds are found in the manufacture of aircraft parts, electrical contacts, industrial motors, filaments, and high-strength steel alloys.

How can you avoid contact with **molybdenum (v) chloride**?

Avoid products that list any of the following names in the ingredients:

- EINECS 233-575-3
- Molybdenum chloride
- Molybdenum pentachloride
- Molybdenum(V) chloride
- Pentachloromolybdenum

What are some products that may contain **molybdenum (v) chloride**?

Aircrafts

Cast Irons

Stainless Steels

Tools
