

chromium (iii) chloride

Where is **chromium (iii) chloride** found?

Chromium (III) chloride is a violet colored solid. It is used in the preparation of many inorganic compounds of chromium, which are used to make products such as flame retardants, fire extinguishers, refrigerants, and propellants.

How can you avoid contact with **chromium (iii) chloride**?

Avoid products that list any of the following names in the ingredients:

- C.I. 77295
- CCRIS 5557
- Chromic chloride
- Chromium trichloride
- Chromium(3+) chloride
- Chromium(III) chloride
- Chromium(III) chloride, anhydrous
- EINECS 233-038-3
- HSDB 6341
- Puratronic chromium chloride
- Trichlorochromium

What are some products that may contain **chromium (iii) chloride**?

Flame Retardant Textiles

Fire extinguishers

A clinician's point of view.

Additional resources and links for **chromium (iii) chloride**.

To submit resources or links, please fill out the submission form at the top of this page.

For additional information about products that might contain **chromium (iii) chloride**, visit the Household Products Database online at the United States National Library of Medicine. These lists are brief and provide just a few examples. They are not comprehensive. Product formulations also change frequently. Read product labels carefully and talk to your doctor if you have any questions. These are general guidelines. Talk to your doctor for more specific instructions.
